

An aerial photograph of a workshop space. In the center, a large, circular structure is being built from numerous thin wooden poles, connected by dark, circular joints. Several people are gathered around this structure, some standing and others sitting. To the right, there's a table with various tools and materials, including a power drill and stacks of wood. A yellow plastic crate is on the floor to the left. The floor is a light-colored concrete. The overall scene is one of active construction and collaboration.

GSS Advanced Computation for Design

14th - 18th July, 2025

The background is a grayscale map of a city street grid. Overlaid on this is a heatmap with a color gradient from yellow (low density) to red (high density). A large orange rectangle is centered on the map, containing text. Various icons are scattered around the map: a pink square in the top left, a pink envelope icon in the bottom left, a series of orange circles and pink envelopes along the bottom edge, and a red circle with a white center in the bottom right.
