

# LED expo

NEW DELHI

27 – 29 November 2025  
Yashobhoomi, Dwarka, Delhi

India's only  
exhibition  
covering the  
entire value  
chain of the  
LED industry

The background of the entire image is a deep blue with a series of fine, parallel white lines radiating from the center, creating a sense of depth and technology. In the lower-left corner, there is a display of various LED lighting fixtures, including spotlights and floodlights, arranged on a white surface. In the lower-right corner, there is a close-up of a control panel with several circular buttons and a small screen. A bright, glowing blue rectangular frame is centered in the image, containing the main text.

# LED for a brighter tomorrow

The LED industry is evolving rapidly, driven by technological advancements and the global push for sustainability. As a hub for energy efficiency, smart solutions, and modern infrastructure, LED Expo is your gateway to this transformation.

Bringing together industry leaders, innovators, and stakeholders, the event showcases cutting-edge technologies and emerging trends fostering collaboration and driving business growth. Focused on smart systems and sustainable applications, LED Expo is shaping the future of lighting.

99%

Visitors likely to recommend a visit to LED Expo to business friends or colleagues

90%

Exhibitors were satisfied with overall visitor profile

96%

Visitors were satisfied by the products and technologies showcased and vendor supplier contact development

In the last 10 years, India's growth in lighting, particularly in the LED segment has been significant and this is what I also felt after visiting LED Expo New Delhi. Many developing countries have also participated here and this will create bilateral opportunities for the MSMEs. I believe the show will expand the clusters of this product category.

***Shri Milind Deore, Secretary, Bureau of Energy Efficiency, Ministry of Power, Government of India***

This is a very good experience because the Indian and international LED manufacturers and suppliers have brought their designs here and the transformation happening through LED lighting is showcased here. Some Indian manufacturers participating here show how the LED industry has advanced the in the last five years and the industry has grown exponentially. This shows our LED industry has become more mature. The Indian and international exhibitors showcasing their products are very competent with each other. This creates a great learning experience for both of them and is good for the visitors.

***Ar Abhay Purohit, President, Council of Architecture***

This industry is absolutely growing here and it is fascinating to see the level of adoption of LED in India. I am from Europe and we are still going through that transition, but here in India it is far more advanced. The next step is to see smart lighting and utilising LEDs more effectively.

***Mr Kristian Jenkins, Business Development Head, Asia Pacific – CASAMBI***

# Exhibitor product groups

- LEDs
- Applications and lighting
- Lighting products
- Signage and display
- Components / accessories & raw materials
- Manufacturing equipment, machinery and allied products
