November | Online | #UKPHC20

## KEYNOTE CASE STUDIES

With a pick and mix of weekly sessions to choose from – the UK Passivhaus conference is brimming with a multitude of Passivhaus projects, from humble innovative self-builds to ambitious municipal masterplans. Here we highlight the **Passivhaus keynote case studies** featured on day 1 – Wednesday 04 November.

Discover some gargantuan development plans at the University of the West of England, covering 21,000 sqm and on track to become the largest **Passivhaus student residences** worldwide. The architect & Passivhaus consultant share a design perspective when designing with the Standard at scale.

Set to make a splash next year – progress at **St Sidwell's Point**, the UK's first Passivhaus leisure centre & pool, is advancing well. We shall get a live contractor walk-through to see an exclusive on-site view of construction.

Do not miss the UK's first **Health Centre** aiming for Passivhaus certification & starting on site imminently. We examine how Passivhaus can meet the ventilation requirements of clinical environments, and explore the use of modular construction.

If that doesn't fill your boots, and you are after more self-build inspiration - taking place that same week is the virtual
