EDGE Discovery Workshop

FOR EMERGING ARCHITECTS, PLANNERS, DEVELOPERS & STUDENTS

SAT 20 FEB 2021
10.00 AM [WAT]

details ▶

Lagos, Nigeria – 12 February 2021

International Finance Corporation IFC of the World Bank Group and Ministry of Architecture, Lagos invites emerging architects, planners, developers and students to a virtual discovery workshop designed to introduce them to the future of climate business through achieving Excellence in Design for Greater Efficiencies EDGE in building design and construction. Through this workshop, students and practitioners can begin the journey to experience and certification in sustainable design & development.

It is a pre-registration event that will last 90 minutes and chaired by EDGE experts from the IFC: Dennis Quansah and Temilola Shonola. It will feature a presentation with case studies

of green buildings & developments, a live demonstration of the EDGE Tracking App, Q & As and a survey form to be filled at the end. Attendees will also receive a certificate of participation.

Registration must be done by 12.00am [WAT] 17 February 2021 via:
bit.ly/RegisterForDiscoveryWorkshop.

About IFC

IFC, a member of the World Bank Group, launched EDGE - Excellence in Design for Greater Efficiencies to help designers and developers reduce their buildings' energy and water consumption by 20 percent while lowering greenhouse-gas emissions. It provides a free software: EDGE App that allows designers to assess early on the resource efficiency level of buildings using various options and alternative materials.

About The Ministry

The Ministry is an initiative of the Ministry of Architecture to groom troopers who will go on to be transformation agents in their communities. Through practical, on-the-job education, we act as a finishing school for students and graduates of architecture, real estate, and urban planning. We collaborate with established organizations such as MIT, World Bank, University of Ibadan Nigeria to make our live projects the object of practical education.

About Ministry of Architecture

Ministry of Architecture is a citizenship-driven architecture organization transforming communities everyone is looking away from. We believe transformation of communities begins with us so we typically commence every project as a public inquiry inviting young, curious, inexperienced but talented architects into our design/planning process. Established in 2020, we are registered in Nigeria and United States of America. We have designed and built in far-flung places from Jos to Johannesburg.
