Sustainable fashion Hub challenge  
<https://competitions.uni.xyz>

img\_1: Increase rate of sales in consumer markets - A concept

# Premise

Today the Global Apparel Market is worth \$1.34 trillion a year in retail sales, projected to grow to reach \$1.4 trillion by 2025, with almost **75% of the world's fashion market concentrated in Europe, USA, China and Japan.**

**Fall in prices, quicker production rates and easier access to fashion ([fast fashion](#)),** has meant that fashion is now more accessible to the common man than ever before.

Taking a look at Europe, for example, [studies have shown that the percentage of clothing bought by a resident of the European Union has increased by 40% in just a few decades](#), with the current spending average of about [\\$782 per year per capita](#).

img\_2: The large extent of pollution that the apparel industry is responsible for.

# Issue

But at what cost?

**The clothing and textile industry is the second largest pollutant in the world** (following oil) contributing to **10% of global greenhouse gas emissions.**

Reasons which cause concern include

- Abuse of natural resources (land, water and an increased use of chemicals and pesticides) for the production of raw materials at a faster rate..
- Manufacturing and finishing processes such as spinning, dyeing or giving the fabrics strength and shine are energy-intensive processes in which large amounts of water and chemicals are used.
- Most textile raw materials and final products are imported into the EU, which means long delivery routes.
- **Consumer User Pattern**

Img.3: Image indicative of the large amount of non recyclable waste generated by the apparel industry.

# Issue

The global environmental impact of clothing in Europe is high, almost accounting **2% to 10%** (depending on the type of impact), estimated to increase at least by 50% by 2050.

The 'Big 5' combined, **Germany, the UK, Spain, France, and Italy**, produce and consume a much greater quantity of clothing than the rest of the EU, and as such have a much higher environmental impact.

Studies examining the clothing waste disposal across countries of Europe have shown that the countries found to be discarding the greatest quantities of clothing, per capita, are Italy, Spain, the UK and the Netherlands. Spending on clothing per capita is also highest in Italy.

Findings also include

- **Behaviour change amongst consumers** can make a big difference to the environmental impact of clothing.
- **Reducing clothing in residual waste is a key area of focus.**

Img\_4: Image indicative of flea markets which promote resales and second hand markets.

# Solutions?

Studies have further shown

- **Behaviour change amongst consumers** can make a big difference to the environmental impact of clothing.
- **Reducing clothing in residual waste is a key area of focus.**

Various ways to address these issues have been proposed by the European Union, including developing new business models for circular fashion and attempting to sway consumers from their traditional choices and behaviours towards more sustainable options.

Adopted by Europe in 2018, the system of **circular economy** (Inspired by the natural lifecycle) promotes **Reduce, Reuse, and Recycle**.

Img\_5: Departmental stores with mannequins donning fast fashion.

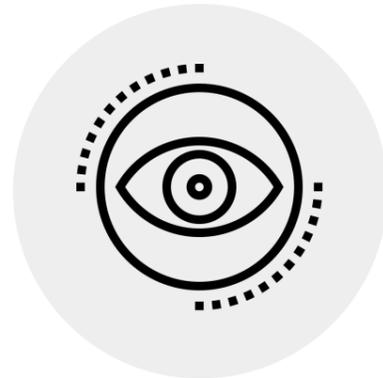

# Brief

What does this mean when we extend it to the realm of fashion? How do we **reduce waste** and keep materials within the consumption and production loop for as long as possible? How do we **maximize the life cycle of products**? Would redesign be a **viable solution**? Would the use of **recyclable material** help?

How do we **empower second hand and reselling platforms**? How do we work towards making a **positive impact** on the environment? And most importantly **how do we ensure that their quality is second to none**? Can design be used as a tool to inspire, create awareness and change perspectives?

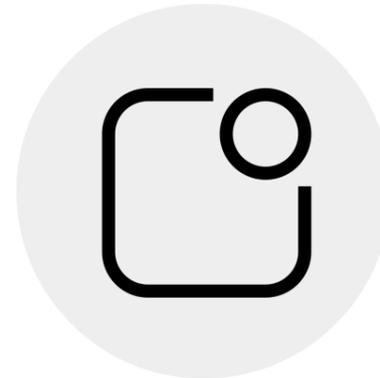

**Brief:** Design a **Fashion Hub** to **sensitize the community** about the increasing **negative effects of fast fashion**, and the dire need to adopt a **sustainable lifestyle**.

# Objectives

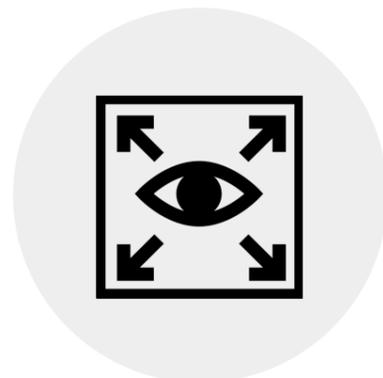

## Vision

Of being able to use design as a catalyst to create awareness.

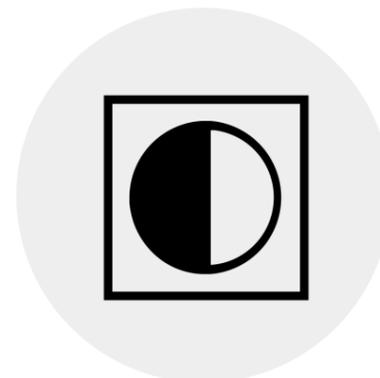

## Function

To be a combination of complex, collaborative spaces of commercial activity and learning

## Quality

Demonstrative of sustainability

## Balance

Between a human - centric and a techno- centric solution for the modern consumer.

The following objectives can be a point of beginning to conceive this design. Participants can assume their own contexts and users before initiating their design process.

Img 6: Image representative of collaborative learning/community spaces.

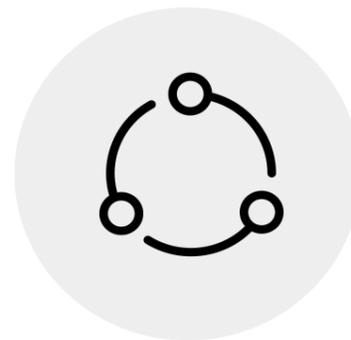

# Program Outline

The following programmatic outline is recommended for this challenge. Participants are recommended to craft a schematic programme based on these given segments or they can propose something new altogether.

## Retail

Flexible spaces to host commercial activities

## Learn and Create

Workshops, Small manufacturing studios and spaces for exhibits

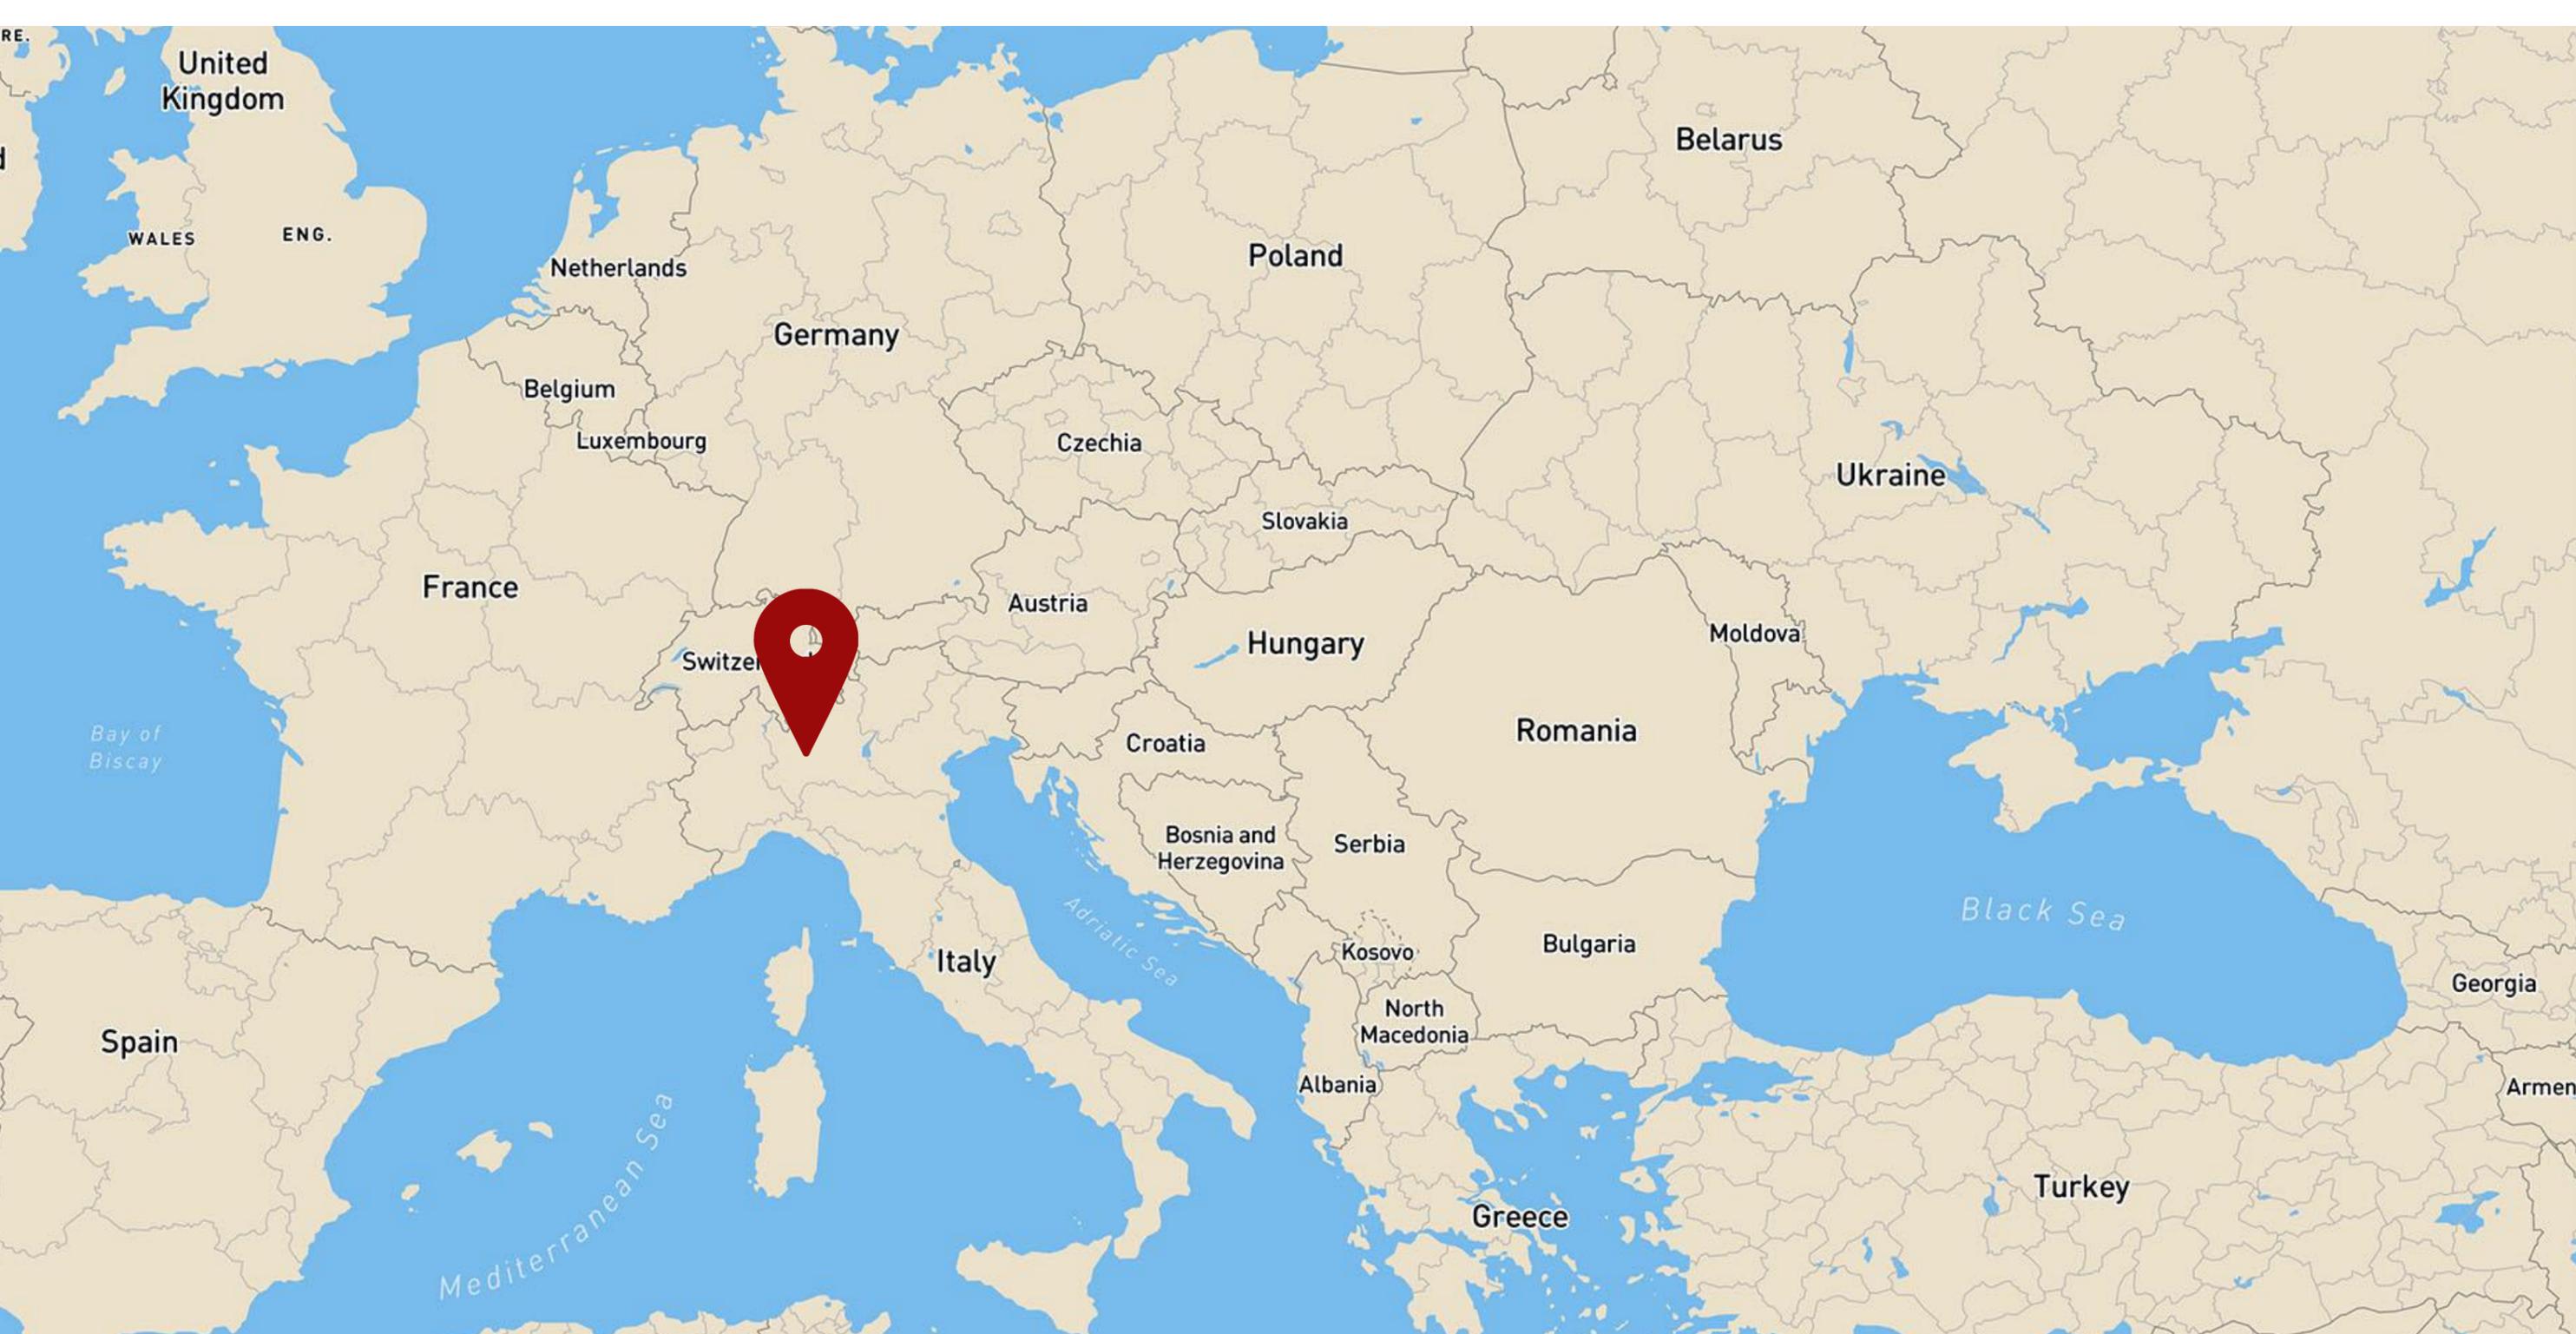

## Community

Spaces which promote a sense of community

## More?

What will be your special ingredient that will make this market outstanding?

Img 7: Location of Milan with respect to Italy.

# Milan, Italy

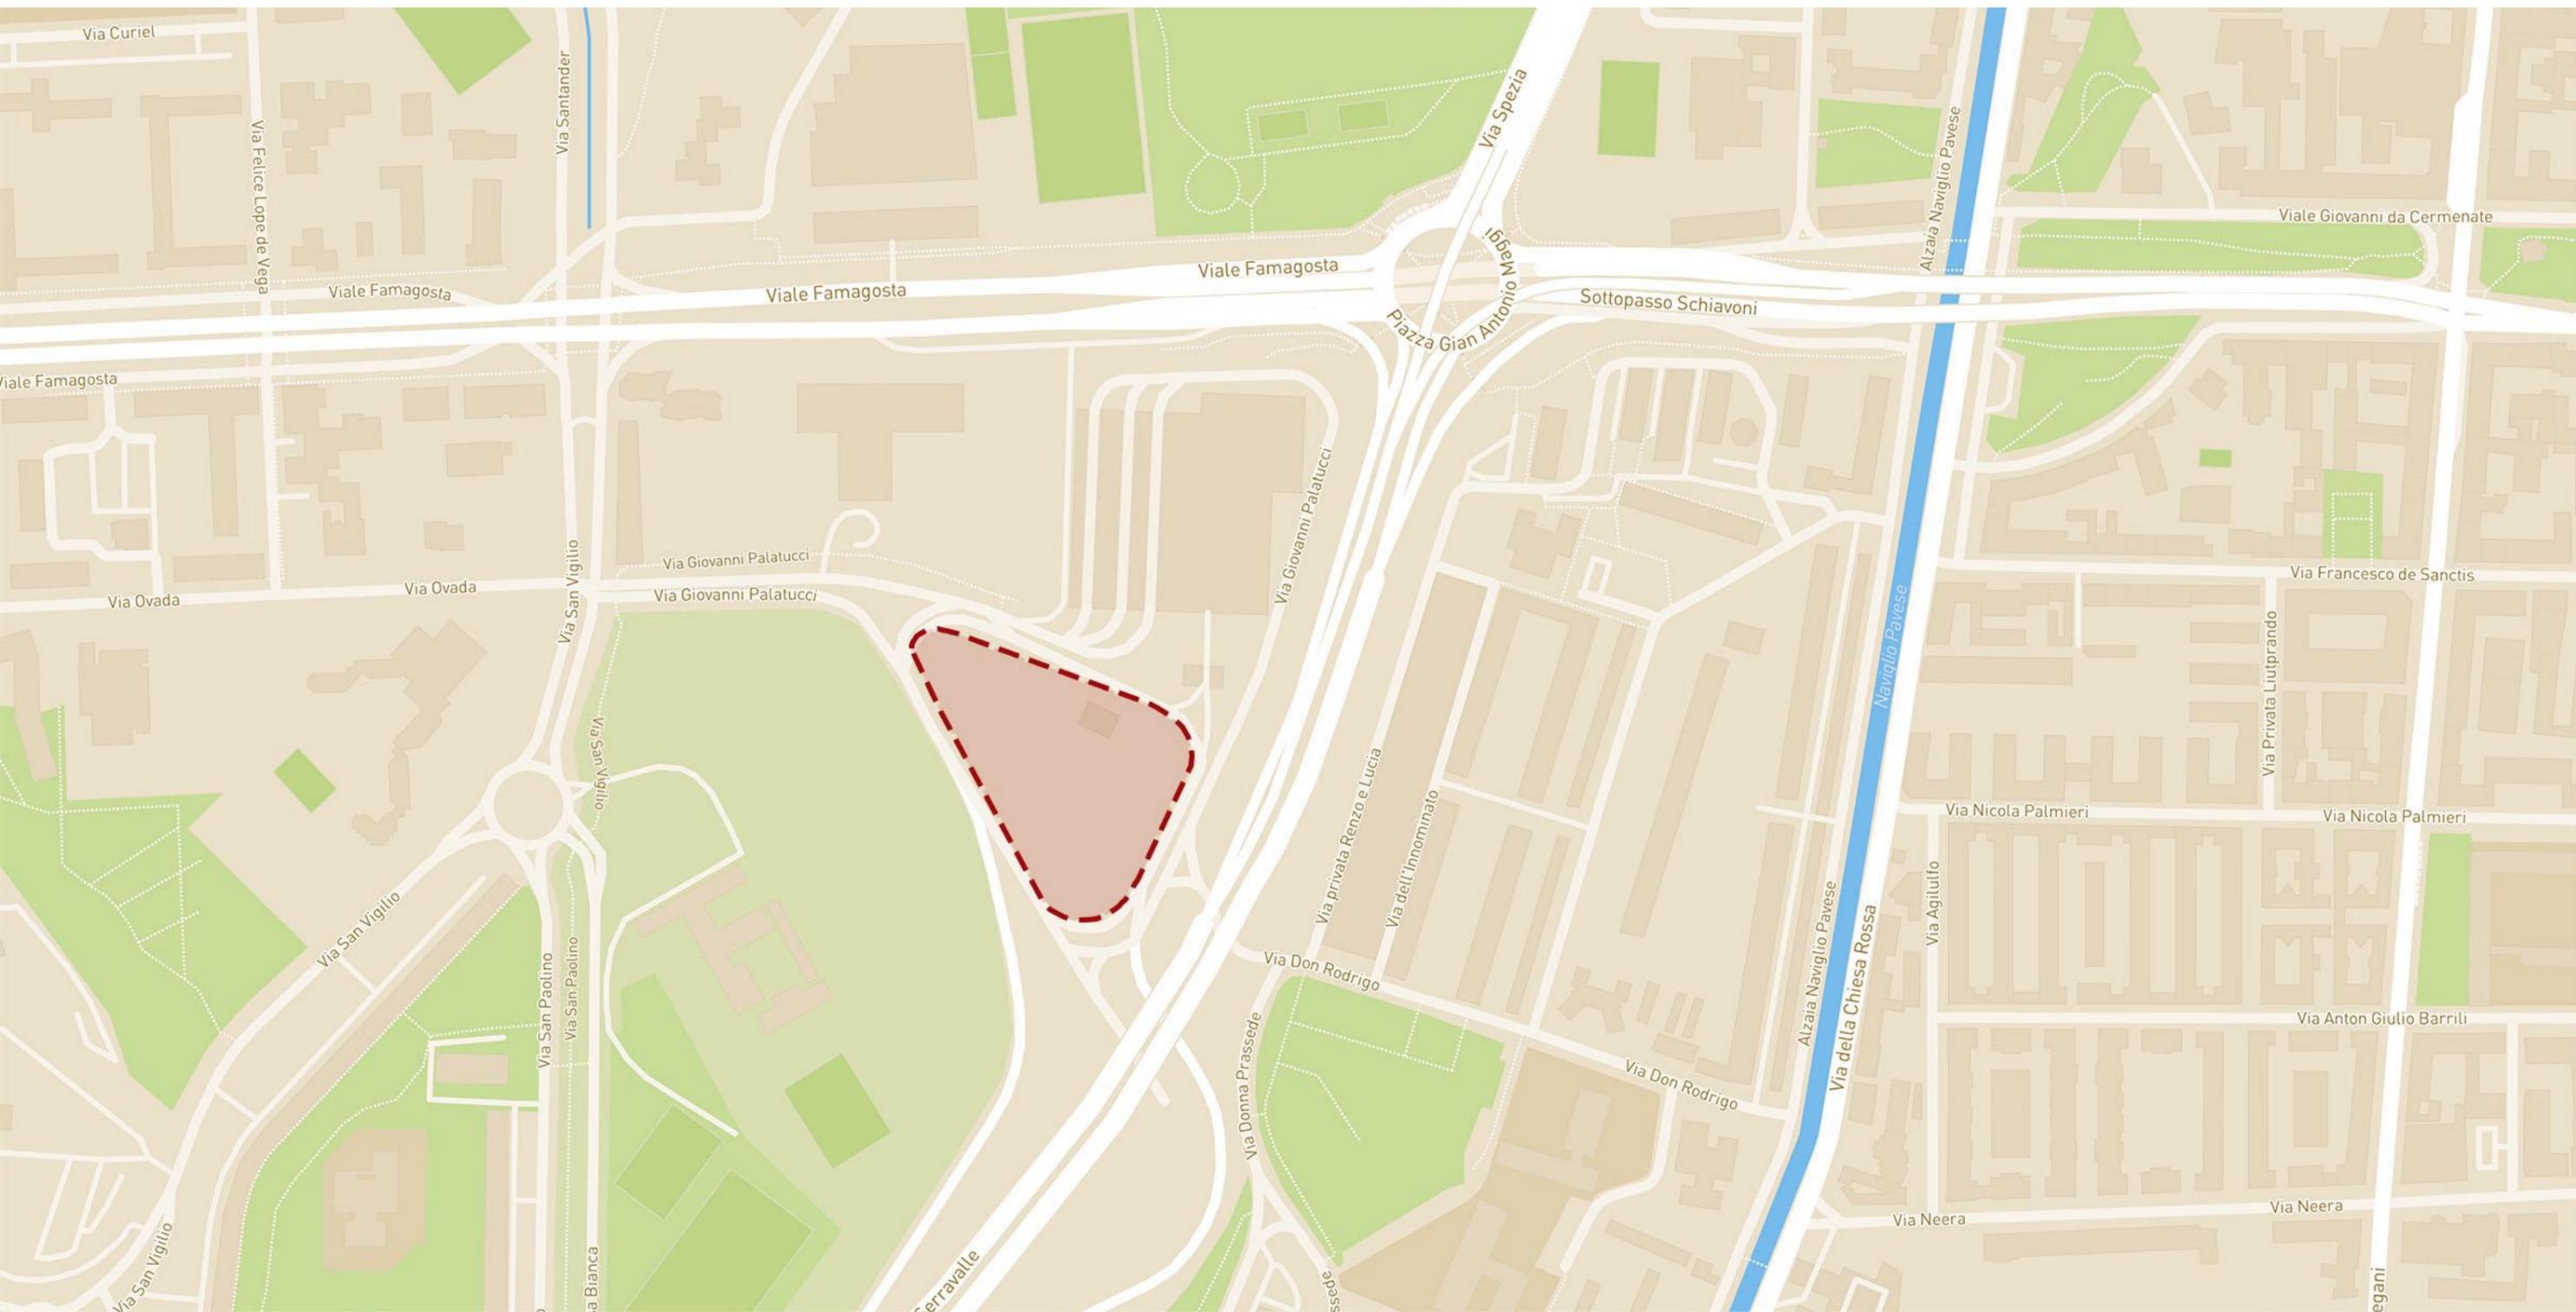

Alan Garner said “**speak English, kiss French, drive German, and dress Italian**”. World renowned for its high-quality craftsmanship, sharp tailoring and luxurious designs, **Italy has been leading the Fashion Industry** since the 11th century. At its core is **Milan**. Hosting a **fashion week** bi-annually, each autumn and spring, Milan welcomes the who’s who of fashion in an aim to showcase their new collections ahead of when they will be available for purchase.

[Img 8:](#) Galleria Vittorio Emanuele II, Milano, Italy. Italy's oldest active shopping mall.

# Milan, Italy

Last September **sustainability and minimalism** came into sharper focus at Milan. Exhibitions spoke about increasing **transparency in production and about the rise in conscious consumerism**. While some see Milan's fashion week as superficial frivolity, it is not all fun and games. In recent years, it has come to be **a key event to promote sustainability in fashion, especially with a focus on luxury products**.

Img 9: Location of site.

# Site Plan

Within half a kilometre distance to the Collegio di Milano, this site was chosen in understanding of the vital role that the youth play in making tomorrow.

Close to several tourist attractions( Cascina Monterobbio, San Giovanni Bono Church), it is located within walks reach to a public parking facility and public transport (metro and bus) systems.

Area: 15, 754. 8 m<sup>2</sup>  
 Site coordinates: [45°26'07.2"N](#)  
[9°10'05.4"E](#)

# Submission

You have to deliver an architectural outcome on the following site, based on the given outlines.

- Recommended number of boards/sheets - 6 boards/sheets. – [ **2362px x 3544px** ] or [ **400mm x 600mm in 150 dpi**] in portrait digital format (JPEG). Minimum 3 boards/sheets & no maximum boards/sheet limit.
- Each image should be less than **15MB**
- You can find the preset PSD, AI and INDD template files in the 'additional resources folder' and [here](#).

**This additional resources folder contains:** FAQ Questions, High Res maps, Street images and CAD file of the site plan.

Minimum requisites are sheets/boards + Cover image containing:

- Site plan (Compulsory)
- Key conceptual sections x 1 (Minimum)
- 3D views x 4
- Cover image/Thumbnail of size 2000 x 1000 px or larger in aspect ratio 2:1.
- Floor plans, images, sketches (if any) can be added to support the entry in the form of additional images.
- Answer 6 FAQ questions in the discussion section as given on the 'additional resources folder'.

- 
- + The team limit for this competition is 4 members maximum.
  - + Use exploded views to discuss multi levelled conceptual models better.
  - + Ensure that the final sheets which are submitted do not include your name or any other mark of identification.
  - + Mention sheet number on corner of every sheet.
  - + This is a design ideas challenge only. There is no built commission/realization is associated with the problem
  - + Plagiarism of any idea / form / design / image will be disqualified with a notice.

**Registration page here:** <http://competitions.uni.xyz>

**Submission Deadline: 22 May, 2020**

Submission closes this day.

**Public Voting begins: 2 Jun, 2020**

Submitted entries are open for voting.

**Public Voting ends: 23 Jun, 2020**

Voting ends on this date.

**Result Announcement: 3 Jul, 2020**

Result day!

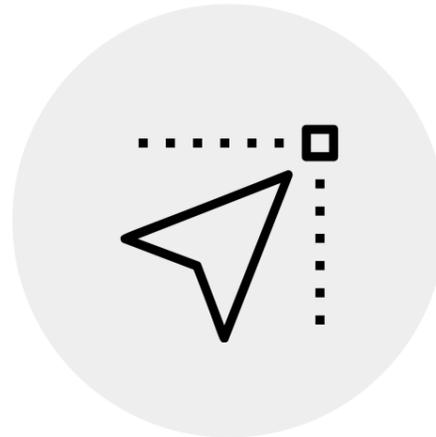

# Rewards

Grants of up to a total of **20,000\$** can be won on this challenge. Learn more about the full conditions on the competition page [here](#).

# Judging Criteria

The entries will be judged by an international jury of the competition on the following criteria:

## Presentation

The fundamental to a good entry is a good presentation.

## Concept/Idea

Quality of thought and intent in pre-design phase.

## Spaces/Programme

How the spaces are calculated and ordered.

## Design Output

The final architectural outcome of the solution.

The judging panel can also add other criteria based on their internal discussions - which will be in line with the problem statement. Participants are advised to fulfil above given criteria first in their design.

(Ad) Unist Subscription:

## Live fast. Compete hard.

Contemplating on various deadlines to participate? Think no more.

Unist Subscription™ is world's only premium pass to compete in various design competitions at a flat fare. Unist subscription is aimed to enable participants to compete better - faster - stronger in world class design challenges. You also save on various gateway charges and can make multiple teams for various challenges. Click to learn more.

**Unyt** serves as a part of UNI in the realm of **typological discoveries**. It intends to break the fusion of traditional design barriers and methodologies by making it a platform for experimentation. It embarks on mobilizing ideas where creators can elementally question the buildings we create. It is a research initiative dedicated to providing opportunities for designers from all domains to explore ideas that go beyond the restrictions of usual architectural discourse.
